

TILE GLUE

تايل جلو

An Innovative additive to convert traditional tile mortars into professional Tile Adhesive.

Adding Value

Tile Glue is the product that provides a professional addition to the market for ceramic, tiles and mosaic fixation. By adding a small pack for each cement bag, in an economical way that does not cost the owner or contractor high cost, or the need to buy professional materials for ceramic fixation.

Economic and easy to apply

One pack for each cement bag, easily mix in the usual way. One packet of **Tile Glue** produces about 200 kg ceramic fix material, which is very similar to the professional ceramic fixation material. This provides an innovative solution with low cost and high quality.

Specifications

- Soft powder, light beige.
- The packet weighs 0.5 kg (500 g).
- Packed and sealed in plastic bags.
- Does not contain any toxic or harmful substances.
- Product validity for two years provided the safety of the package.

Tile Glue Features

*The Technicians of ceramic fixation is always suffering that they have to place the mortar on the ceramic tile before it is fixed on the walls, which causes heavy workloads and poor productivity of the daily work. And with the cost of ceramic finishing materials, the problem has been extended for now.

* The tile contractors, engineers and consultants, can now handle ceramic fixation in a more professional way with **Tile Glue**. The addition of the packet to the cement bag transforms the ordinary ceramic fixation material with all its defects into a ceramic gluing material of a professional quality similar to that of high-cost of the readymade ones.

Application field

- Additive for ceramic mortar mixture to various adhesive areas.
- This can be apply to any type of tiles: Ceramic, mosaic, cement tiles,....
- Perfect additives to porcelain tiles, since the absorption rate of porcelain tile back is very weak, making the regular mortar very low efficiency in this case.
- If ceramic tiles are to be applied over old ceramics, it is recommended that the old ceramic be polished with a circular cylinder.
- It can reduce the cement content and save our environment.

Components:

✓ Each packet contains the latest additives for ceramic gluing technology in a powder form. These additives increase the viscosity and strength of the cement mixture adhesion of ceramic tiles to walls and floors, whether these surfaces are brick, mortar, old ceramics, concrete.
