

GBFILL W

جي بي فيل دبليو

Waterproofing mortar for filling joints between natural stones, Marble Tile, and Granite

Added Value

GB Fill W is a product specially designed for use in all applications of Natural stones including marble and Granite with a very low water absorption rate, which cause the cracking and separation of the traditional joint filler material and also provide isolation of water leakage between and under the tiles, which causes the dislocation and removal of tiles.

Application and Rates

GB Fill W is easily mixed with water, producing an easy-to-apply, creamy material applied by the normal trowel, and then remove excess material by wet sponge.

Delivered in 20 kg double-layer packages against moisture.

Product Specifications

- Gray or white very soft powder (special colors could be produced on request).
- The application rate of 4-6 meters / 1 kilo material at thickness interval of 5 mm.
- Material stress 200 kg / cm²
- Mixing water 4- 4.5 liters per package 20 kg.
- Product validity for one year from the date of production provided the packaging is safe.

GBFill W Features.

* **GBFill W** is specially designed for the purpose of being a strong material treated with polymers and special materials to produce when only mixed with water an easy to apply, creamy mortar for the joint filling applications, and can be applied to all types of natural stones like Mica tiles, marble tiles, and Granite tiles.

* After application of the material on the joints between the tiles from 5 mm to 10 mm thickness and the complete drying of the mortar, **GB Fill W** provides a final solution to prevent water leaks under the tiles which causes the dislocation and removal of tiles from the substrate.

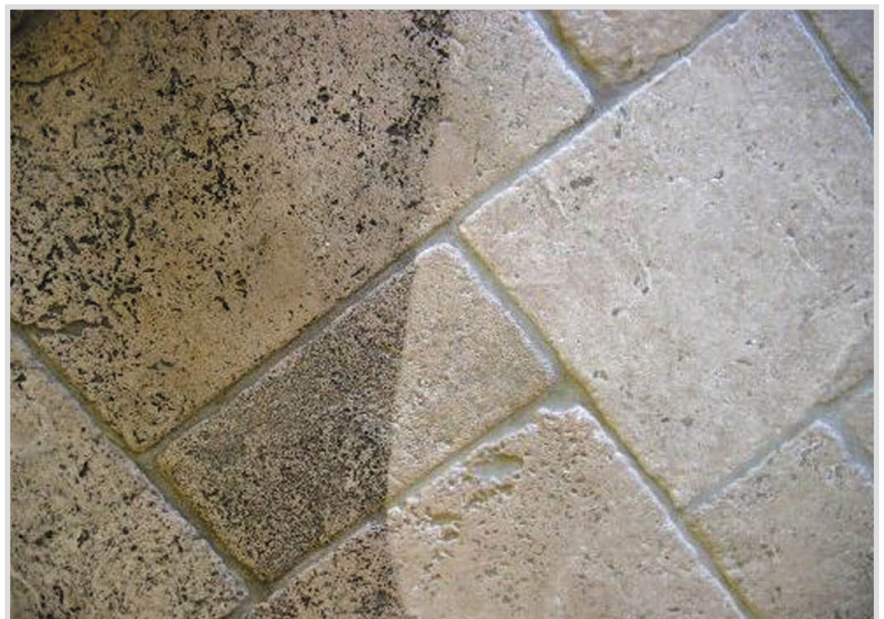

Application fields

GB Fill W is used in the following areas and applications:

- Grouting between all types of natural stones like Mica, Marble, Granite,
- Kitchens: Household and commercial, such as restaurants and hotels, Super, and hypermarkets and malls.
- Home baths and showers.
- To prolong the life of all natural stone tiles and protect it from leakage of water under the tiles and their separation from the substrate.
- Does not contain any harmful substances to the environment and contain more than 60% of the composition on natural materials safe recycling.

Components

- Each pack of **GB Fill W** contains the latest adhesive technology in a special blend that makes the material easy for application to be homogeneous and strong glued to the sides of the tiles, especially tiles with a very weak adsorption rate such as granite tiles.
- Each package also contains special materials to prevent cracks that appear in the case of the use of ordinary cement in the filling of joints of tiles, in all natural stones tiles types.
