- Valid for 2 years from production date in un-opened packs.

GBGuard

* Using natural stones like marble, granite, and Mica was and still a good solution for architecture and decoration in residential and commercial buildings, but the tendency of these stones to absorb water and dust is an annoying problem.

* **GBGuard** is a special product to waterproof and protect the natural stones, whatever its type, and also maintain the color and appearance of the natural stone, since after application and complete drying it leaves no gloss or semi gloss coat, or hiding the natural beauty of the natural stones.

* **GBGuard** also protect the natural stones from coloring by accidental spillage of coffee or tea or any juice

Application Fields:

- Protection of the natural stones from rain and bad weather
- Protection of unfinished (irregular) marble from water absorption and mildew growth.
- Protection of the heat resistant tiles from dust and dirt.
- Protection of the tile joints in bathrooms and kitchens from water vapor and dirt.
- Covering and protection of Dry Coat applications in facades against deterioration and dust.
- Protection of the precast buildings specially colored ones against rain and dirt.
- Water based material could be used in many applications safely, and does not contain any harmful materials or solvents, it is **GREEN**.

Shelf Life:

-2 years from the date of production labelled on the pack.

Cleaning:

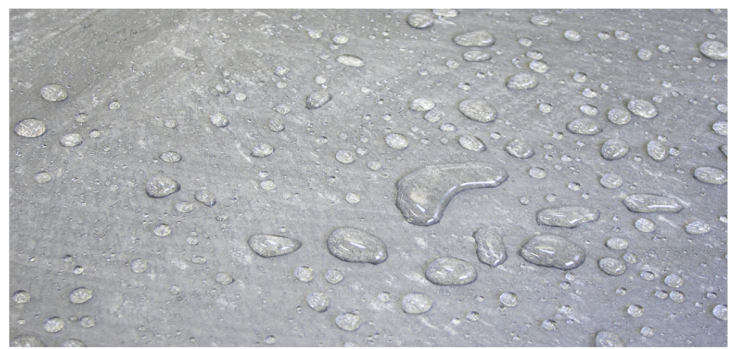

- Any remains or spillage of **GBGuard** can be removed with Water.

Health and Safety:

- **GBGuard** is neither a toxic nor flammable product.
- In case of contact with eye wash with plenty of water and ask for medical assistance.

Components

- **GBGuard** contains special silicone polymer which penetrates the surface and block the porous structure of the natural stones, and Dry Mortar applications, the water like consistency of the products helps in the full penetration of the **GBGuard** to the surface.
- It also acts as water repellent for rain acidic water which is harmful for facades.
- **GBGuard** also prevents the appearance of the white spots on the different types of facades.
